

## ORGANIC SHALLOTS

The excellent thermal amplitude, low rains and ambient humidity added to a light soil, are the perfect factors for the production of Shallots.

Intense colors, firm and dry skin are outstanding quality of our products.

Argentbio is one of the few producers of Shallots of Argentina and the only one in 100% organic conditions.

- Conservator Shallots long day, planting August 20 crop 3rd week of February. Material suitable for storage
